QUALITY POLICY

Unik Construction Engineering (Pty) Ltd, providers of construction and engineering solutions for residential, commercial and industrial projects in both the public and private sector, will work in close association with all stakeholders, addressing relevant internal and external business issues, to provide a level of product and service quality that will always meet or exceed client expectations.

Central to this objective, arises the requirement for world class precision and accuracy in critical processes of our business. We are therefore committed to the operation of an effective Risk Based Quality Management System in alignment with ISO9001:2015, designed to support this objective. Such a management system ensures that business objectives are clearly defined, measured and addressed in support of Unik Construction Engineering (Pty) Ltd's growth strategies.

Unik Construction Engineering (Pty) Ltd will commit the resources and create an environment in which each employee can contribute skills, talents and ideas to an ongoing process of continual improvement, innovation and growth through business objectives that are periodically reviewed and reset in line with business strategies.

In the pursuit of business goals, Unik Construction Engineering (Pty) Ltd will also endeavor to satisfy statutory and regulatory requirements, whilst maintaining the highest levels of hygiene, health, safety and environmental sustainability within its operations, with due consideration to the related business risks and opportunities.
